

Swanson Reroute

Written by Swanson Trailleader

Hey,

The initial stab at the reroute is cut in for the most part. Still need some help cutting out the grass roots so the matted dead grass can break loose. Also, need folks to try riding it so I can see where the groove is forming and make adjustments, and I'm going to hit that area with some Round-Up to accelerate the groove in process.

The last "S" turn is kind of tight bring you back to the old trail. Will probably retouch that area to make it flow faster. 😊
